Superform / UP Token Disclosure[1]

Table Of Contents

The following disclosure is intended to provide an overview of Superform and UP tokens. Nothing in this disclosure should be viewed as a statement about the future of Superform or the financial performance of the UP token.

1. Project Information

Description of the Project

Superform is the user-owned neobank, combining non-custodial vault infrastructure with smart account technology to deliver institutional-grade DeFi access with a consumer-friendly experience. The platform consists of:

- **Superform Web & Mobile:** Native applications for iOS, Android, and web providing unified access to DeFi enabling users to swap, send, and spend their onchain assets.
- **SuperVaults**: Permissionless, non-custodial institutional-grade vaults secured by a validator network that execute flexible strategies with deterministic price-per-share (PPS), management, and performance fees.
- **UP Token**: The native coordination and governance asset that aligns network participants through staking, bonding, and decentralized governance.

[1] The content in this Disclosure has been provided by Superform (BVI) Limited, a wholly-owned subsidiary of the Superform Foundation. This document is provided solely for informational and transparency purposes and does not constitute an offer to sell or a solicitation of an offer to buy any tokens or securities in any jurisdiction. The issuance, distribution, and use of UP tokens are intended to comply with applicable laws and regulations; however, regulatory treatment may vary by jurisdiction and change over time. Information contained herein is provided as of the date of publication and may be updated, amended, or supplemented by the Superform Foundation from time to time without obligation except as required by applicable law.

The protocol's modular design allows developers and users to compose strategies such as bridging, swapping, lending, and staking without requiring trusted intermediaries or protocol upgrades. All operations are non-custodial, meaning users maintain control of their private keys and assets at all times.

The Superform ecosystem is supported by the Superform Foundation, a Cayman Islands Foundation company established on January 23, 2025. The Superform Foundation is overseen by a board of directors consisting of two Cayman-based independent directors and Vikram Arun. Superform (BVI) Limited, a British Virgin Islands entity, is responsible for activities related to the UP token, and the Superform Foundation is its sole director.

ZeroPoint Labs Inc., a Delaware Corporation doing business as Superform Labs, is a core contributor to the Superform protocol and provides development and technical services related to the implementation and ongoing development of the protocol. Superform Labs was co-founded by Vikram Arun, Blake Richardson, and Alexandre Cort.

In 2025, the Superform Foundation received a $100,000 loan from Superform Labs to cover its initial operating costs. The original loan from Superform Labs was a portion of the $10.9m of funding that Superform Labs raised across its funding rounds as detailed below:

- Angel (April 2022): $1.6m
- Seed (November 2022): $4.9m
- Strategic (November 2024): $3m
- Echo (February 2025): $1.4m

Additionally, the Superform Foundation raised $3.6m through multiple token sales:

- Private Sale (September 2025): $0.45m
- Cookie/Legion Public Sale (December 2025): $2.622m
- Echo Public Sale (January 2026): $0.525m

The vesting schedules for UP tokens obtained pursuant to token warrants in the funding rounds are described below in Section 3 (Token Distribution).

2. Token Information

The UP token serves as the native coordination and governance token of the Superform Protocol. It is an ERC-20 token deployed on both Ethereum and Base via a LayerZero OFT.

Supply Information

- Total Supply: 1,000,000,000 UP
- Network: Ethereum & Base
- Token Standard: ERC-20 on both chains
- Decimals: 18

- Contract Addresses:
  - Ethereum: 0x1D926bbE67425C9F507b9A0E8030eEdc7880BF33
  - Base: 0x5b2193fDc451C1f847bE09CA9d13A4Bf60f8c86B

Primary Functionalities

The primary intended uses of the UP token relate to governance-related activities for protocol coordination and security participation.

1. **Governance Participation via sUP:** When UP is staked, it mints sUP (staked UP), a vault token used for governance. Through sUP, token holders can:
   - Propose and vote on incentive allocation, treasury use, and emission parameters
   - Adjust validator policies, registry changes, and price-per-share (PPS) standards
   - Approve listings, risk parameters, and route liquidity in SuperAssets
   - Initiate emergency actions when necessary
   - Voting is snapshot-based to prevent manipulation
   - Governance may adopt deposit or redemption queues for stability
2. **Staking and Security Mechanisms**: To participate in critical network functions, actors may be required to stake UP in accordance with governance policy:
   - Validator Staking: Validators who attest to price-per-share data post UP as collateral, with slashing penalties for dishonest or inaccurate reporting
   - Strategist Bonds: Strategy execution and rebalancing require UP bonds, creating alignment that deters negligence or malicious behavior
3. **Ecosystem Participation**: The token supports:
   - Incentive programs for users and liquidity providers
   - Community initiatives and grants
   - Governance-approved activities promoting protocol sustainability
   - UP-Only rewards programs and staked UP rewards

Important Limitations: UP tokens do not represent ownership, equity, profit entitlement, dividends, or claims on the assets or revenues of Superform (BVI) Limited, the Superform Foundation, or any affiliated entity. Holding UP tokens does not confer any right to guaranteed distributions or financial returns. The functionality of UP tokens is limited to protocol coordination and governance participation within the decentralized Superform ecosystem.

Token Dynamics

The initial circulating supply at launch is 13.9% of total supply (139,224,377 UP), unlocked on Day One on Base. This breakdown includes:

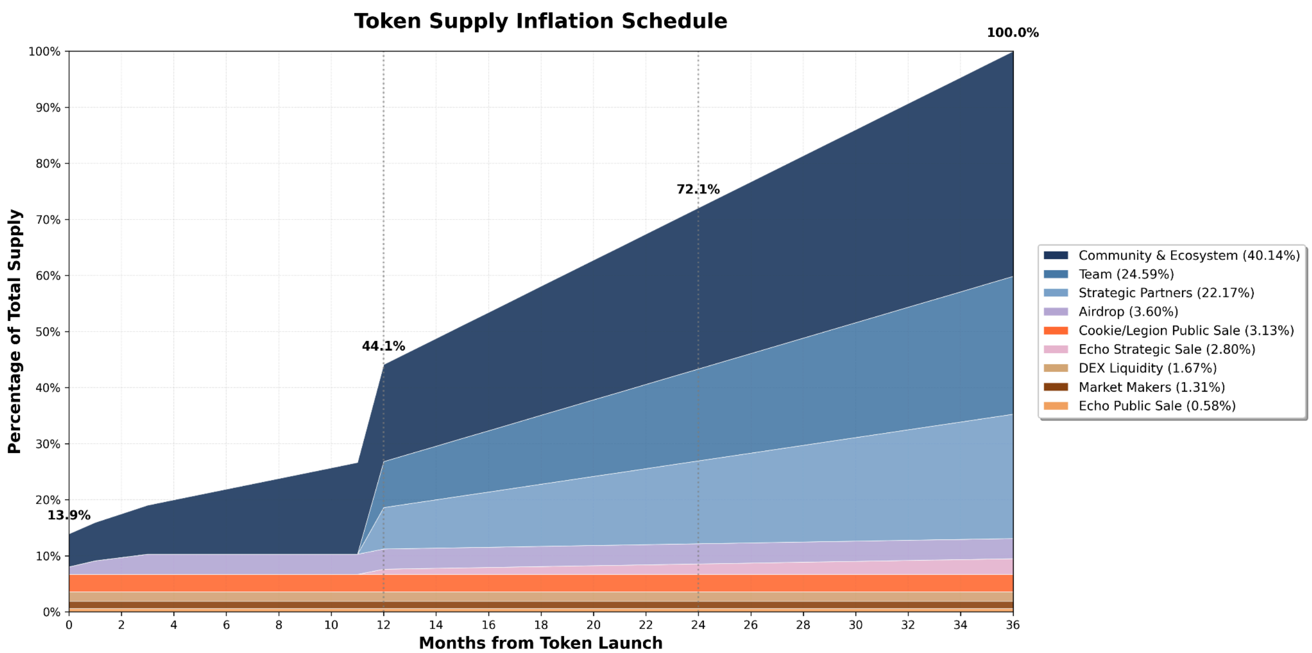
- Public sale participants: 3.72% (fully unlocked at TGE)
- Airdrop recipients: 1.34% liquid on Day One (Out of 3.6% Total Airdrop)
- Liquidity: 2.98%
- Community & Ecosystem: 5.89% available at TGE

Inflationary/Deflationary Mechanics: The token has a hard-capped supply for the first 3 years following issuance, with no minting permitted during that period. After 3 years governance may authorize limited annual inflation up to 2% maximum. Intended uses for new issuance include validator rewards and operations, strategist incentives, community programs and grants, and ecosystem development.

No Planned New Token Launches: There are no plans to launch additional tokens. UP is the sole native token of the Superform Protocol.

3. Token Distribution

Allocation Breakdown



Total Supply: 1,000,000,000 UP

Category	Allocation	Vesting Schedule	Staking Eligible
Community and Ecosystem	40.14% (401,414,553 UP)	5.89% available at TGE, remaining 34.25% vested over 36 months	Yes, but tokens retained by the Superform Foundation or BVI cannot be staked
Core Team & Advisors	24.59% (245,907,736 UP)	1 year cliff, then monthly vesting over 2 years (3 years total from TGE)	No, locked tokens cannot be staked
Strategic Partners	22.17% (221,713,986 UP)	1 year cliff, then monthly vesting over 2 years (3 years total from TGE)	No, locked tokens cannot be staked
Public Sale	3.72% (37,182,670 UP)	Fully unlocked at TGE (unless U.S. person, then monthly vesting over 1 year)	Yes
Airdrop	3.60% (36,000,000 UP)	1.338% at TGE, remaining 2.263% vesting over 3 months	Yes
Liquidity	2.98% (29,777,777 UP)	Fully unlocked at TGE	N/A
Echo Strategic Sale	2.80% (28,003,278 UP)	1 year cliff, then monthly vesting over 2 years (3 years total from TGE)	No, locked tokens cannot be staked

Day One Liquidity Summary: 13.9% of total supply, all on Base

Community, Ecosystem, and Foundation Allocations

The Community and Ecosystem allocation (40.14%) is designed to support long-term protocol growth and does not directly benefit insiders, key team members, or employees beyond their separately allocated team tokens. Compensation for foundation staff and ongoing development is paid from previously raised funds. Future development and operational costs will be paid from revenue.

Community and Ecosystem Use Cases:

- DEX incentives
- Partners and Exchange Listings
- Liquidity incentives for SuperVaults
- User rewards and retention programs
- Developer grants and ecosystem partnerships
- Security reserves and insurance funds
- Marketing and growth initiatives
- Validator and strategist incentive pools

The vested 5.89% day one supply from this bucket will be allocated to Aerodrome DEX incentives, the UP Only Program, Staked UP (sUP) incentives, and community and content activations. Unallocated tokens will be retained for future community and ecosystem activations.

Centralized Exchange Airdrops & Grants: As of the date of this disclosure, no grants, incentive payments, or token distributions in UP have been made to any centralized exchange or exchange-affiliated entity for listing, marketing, or promotional purposes. Any such arrangements, if entered into in the future, would be disclosed in an updated version of this document.

Foundation Holdings: The Superform Foundation holds UP tokens at 0x0027Eea9e867845182c407d51adcaE77fb906cE2 and Superform (BVI) Limited holds UP tokens at 0x97b5e4a707A4D5AB4A58b2c93bc8d249a63Ff153. Both addresses are managed through Anchorage's Porto. See Section 8 (Security) on Multisignature controls for more.

Prior Funding Rounds

Total Raised: $14.5M across multiple rounds

Round	Date	Amount Raised	FDV	Lead Investors	Vesting
Angel	April 2022	$1.6M	$40M	Arthur Hayes, Shayne Coplan, Stefan George, and 20+ angels	Managed by Toku or Anchorage
Seed	November 2022	$4.9M	$50M	Polychain Capital, Circle Ventures, BlockTower Capital, Maven11 Capital, CMT Digital, Hypersphere Ventures, Heartcore Capital	Managed by Toku or Anchorage
Strategic	November 2024	$3.0M	$50M	VanEck Ventures, Amber Group, Node Capital, CMT Digital	Managed by Toku or Anchorage
Echo Strategic Sale	February 2025	$1.4M	$50M	Echo groups (Polymer Pals, Tea Club, Tachyon)	Managed by Echo or Toku
Private Token Sale	September 2025	$0.45M	$80M	CMT Digital and others	Managed by Toku or Anchorage
Public Token Sale (Cookie x Legion)	December 2025	$2.622M	$80-90M	Public Sale via Cookie.fun/Legion	Managed by Legion
Public Token Sale (Echo)	January 2026	$0.525M	$90M	Public Sale via Echo (Tea Club)	Managed by Echo

Notable Investors: VanEck Ventures, Circle Ventures, Polychain Capital, BlockTower Capital (Strobe Ventures), Maven11 Capital, Heartcore Capital, CMT Digital, Amber Group, Hypersphere, Node Capital, Arthur Hayes, Shayne Coplan, Metacartel Ventures, and numerous angel investors.

4. Airdrop

Airdrop Details

Total Allocation: 3.6% of total supply (36,000,000 UP)

Eligibility:

- Deposits into the Superform Protocol via the Superform app or through partner integrations like Pendle, Spectra, Morpho, etc.
- Participated in the Superform Community (Content, Events, Social)
- Qualified for the Cookie.Fun Campaign
- Eligibility criteria, allocation methodology, and claim mechanics may evolve over time or based on governance decisions

Vesting Schedule:

- 1.338% unlocked at TGE
- Remaining 2.263% vests monthly over 3 months
- Total vesting period: 3 months from TGE

Unclaimed airdrop tokens following the claim period will be returned to the ecosystem treasury.

CSV Recipient List

The full airdrop recipient list, including wallet addresses and allocation amounts, will be published prior to the Token Generation Event at: https://www.superformfoundation.org/airdrop.

5. Token Sale Disclosures

Public Sale Information

Cookie X Legion Sale

- Sale Date: December 4-11, 2025
- FDV: $90M (Public Tranche) & $80M (Community Tranche)
- Price Per Token: $0.09 & $0.08
- Amount Sold: $2.622M allocated at final close

- Vesting: 100% unlocked at TGE
- Restricted Jurisdictions: US, UK, China, and OFAC-sanctioned regions

Echo Sale

- Sale Date: Jan 13-Jan 18, 2026
- FDV: $90M
- Price Per Token: $0.09
- Amount Sold: $525k
- Vesting: 100% unlocked at TGE
- Restricted Jurisdictions: US, China, and OFAC-sanctioned regions

Previous Private Token Sale

- Investment Date: September 2025
- Amount Raised: $450K
- FDV: $80M
- Price Per Token: $0.08
- Participants: CMT Digital, other investors
- Vesting: 1 year cliff + 2 years monthly vesting (total 3 years) post TGE

6. Conflicts of Interest

No material related-party transactions involving UP tokens have occurred other than those described in this disclosure.

7. Market Makers & Liquidity

Superform has entered into agreements with independent market-making firms to support secondary market liquidity for the UP token. These arrangements are structured as token loan–based liquidity provision agreements. At the end of the term, market maker tokens are returned to the provider, Superform (BVI) Limited, or can be purchased by the borrower at fixed strike prices. Market maker agreements include an alternative repayment right allowing market makers to purchase loaned tokens at a premium to time-weighted average prices, ensuring the Foundation receives fair value if tokens are not returned.

Market Makers: 1.31% (13,111,111 UP)

1. Amber Group: 0.6% (6,000,000 UP)
    - Role: CEX/DEX Market Making
    - Duration: 18 months initial term
    - Strikes:
        i. 1-Week TWAP + 40% for 1,500,000 tokens
        ii. 1-Week TWAP on month 7 + 40% for 1,500,000 tokens

        iii. 12-Month TWAP at + 20% for 3,000,000 tokens
2. Flow Traders: 0.6% (6,000,000 UP)
    - Role: CEX/DEX Market Making
    - Duration: 12 months initial term
    - Strikes:
        i. 1-Week TWAP + 25% for 1,500,000 tokens
        ii. 1-Week TWAP + 50% for 1,500,000 tokens
        iii. 1-Week TWAP + 75% for 1,500,000 tokens
        iv. 1-Week TWAP + 100% for 1,500,000 tokens
3. Axtior: 0.11% (1,111,111 UP)
    - Role: CEX/DEX Market Making
    - Model: Retainer

DEX Liquidity: 1.67% (16,666,666 UP)

1. Aerodrome on Base, via Arrakis:
    - Role: DEX liquidity
    - Allocation: 1.11% (1,111,111 UP)
    - Pair: UP/cbBTC
2. Aerodrome on Base, via Arrakis
    - Role: DEX liquidity
    - Allocation: 0.55% (5,555,555 UP)
    - Pair: UP/USDC

8. Security

Security Incidents and Hacks

No Major Security Incidents to Date: As of January 2026, neither the Superform Protocol nor the UP token has experienced any security breaches, hacks, or exploits resulting in loss of user funds.

- Superform V1 launched May 2024: No security incidents
- Superform V2 launched October 2025: No security incidents
- UP token deployment: No incidents reported

Third-Party Security Audits

Superform maintains a rigorous security posture with multiple independent audits conducted by leading blockchain security firms:

- Spearbit - Multiple comprehensive audits of all smart contracts
- Cantina - Multiple code competitions for all smart contracts
- Node Security - Review of Superform core

- Orion - Review of Superform core
- 0xMacro - Review of Superform periphery
- Recon - Thorough invariant testing suite for SuperVaults
- Octane - Recurring security tests for all contracts

All critical and high-severity findings from audits have been addressed prior to deployment. Audit reports are publicly available at:

- Superform Core: https://github.com/superform-xyz/v2-core/tree/dev/audits
- Superform Periphery: https://github.com/superform-xyz/v2-periphery/tree/dev/audits
- UP Token Audit: https://github.com/superform-xyz/v2-periphery/blob/dev/audits/2025.11.27-0xMacro.pdf

Multisignature Controls

Superform Foundation multisig (2-of-3 Porto MPC): 0x0027Eea9e867845182c407d51adcaE77fb906cE2. All signers are directors of Superform Foundation and at least 2 of 3 directors are required for any transaction.

Superform (BVI) Limited multisig (2-of-3 Porto MPC): 0x97b5e4a707A4D5AB4A58b2c93bc8d249a63Ff153. The sole director of the BVI is the Superform Foundation. All signers are directors of Superform Foundation and at least 2 of 3 directors are required for any transaction.

No roles exist that have the ability to freeze assets, seize user funds, or blacklist addresses, as we are entirely non-custodial, even with governance approval. The Foundation multisig may mint tokens only after the 3 year period, as discussed in Section 2 Token Information, Token Dynamics.

9. Risks

Participation in the Superform ecosystem and acquisition, holding, or use of UP tokens involves significant risk. Prospective purchasers and holders should carefully consider the risks described below, together with all other information contained in this disclosure, before acquiring UP tokens. The risks described below are not exhaustive, and additional risks may arise.

Token-Related Risks

Price Volatility and Market Risk

The UP token is a crypto-asset subject to significant price volatility. Market prices may fluctuate substantially due to speculation, market sentiment, liquidity conditions, broader crypto market movements, macroeconomic factors, or changes in regulatory treatment. There is no assurance that a liquid market for UP tokens will develop or be sustained. Holders may experience partial or total loss of value.

No Ownership, Profit, or Revenue Rights

UP tokens do not represent equity, ownership, profit-sharing rights, dividends, or claims on assets or revenues of Superform (BVI) Limited, the Superform Foundation, Superform Labs, or any affiliated entity. UP tokens confer only protocol-level governance and coordination functionality within the Superform ecosystem, which may have no economic value.

Liquidity Risk

Although market makers may provide liquidity and UP tokens may be listed on centralized or decentralized exchanges, there is no guarantee of sufficient liquidity at any time. Trading activity may be limited, spreads may widen, and holders may be unable to sell tokens at desired prices or at all, particularly during periods of market stress.

Token Release and Vesting Risk

UP tokens allocated to team members, investors, and ecosystem programs are subject to vesting schedules. As vested tokens enter circulation, selling pressure may increase, which could negatively impact market price.

Regulatory and Legal Risks

Regulatory Classification Risk

The legal and regulatory treatment of crypto-assets remains uncertain and varies across jurisdictions. UP tokens may be classified as securities, financial instruments, or otherwise regulated assets in certain jurisdictions, now or in the future. Such classification could result in restrictions on transferability, trading, or use, delisting from exchanges, or other regulatory actions that may materially adversely affect the value or utility of UP tokens.

Jurisdictional Restrictions

Certain jurisdictions may restrict or prohibit the acquisition, holding, or use of UP tokens. Regulatory changes, enforcement actions, or differing interpretations of applicable laws may limit participation in the Superform ecosystem or impose additional compliance obligations on holders.

Taxation Risk

The tax treatment of UP tokens is uncertain and may vary by jurisdiction. Token holders are solely responsible for determining and complying with applicable tax obligations arising from the acquisition, holding, staking, transfer, or disposal of UP tokens.

Protocol and Technology Risks

Smart Contract Risk

The Superform Protocol and UP token rely on smart contracts. While audits and security reviews have been conducted, smart contracts may contain undiscovered vulnerabilities, logic errors, or integration issues. Exploits or failures could result in loss of funds, disruption of protocol operations, or loss of token utility.

Blockchain Dependency

The Superform Protocol operates on Ethereum and other blockchain networks. These networks may experience congestion, high transaction fees, reorganization events, consensus failures, or other disruptions that could impair functionality, delay transactions, or negatively affect user experience and token value.

Bridge and Interoperability Risk

Cross-chain functionality relies on bridge infrastructure and messaging protocols, which historically have been subject to exploits and failures. Bridge malfunctions or security breaches could result in loss or immobilization of assets.

Oracle and Validator Risk

The protocol relies on validator networks and data providers for certain functions, including price-per-share reporting. Incorrect, delayed, or manipulated data could lead to mispricing, protocol instability, or losses to users.

Governance and Operational Risks

Governance Participation Risk

Governance decisions are made by token holders who stake UP to receive sUP. Governance outcomes may not align with the interests of all token holders, may be influenced by large holders, or may suffer from low participation. Poor governance decisions could adversely affect the protocol or token value.

Centralization and Key Person Risk

In early stages, protocol development and operational expertise may be concentrated among a limited number of contributors or validators. The departure or reduced involvement of key contributors could negatively impact development, security, or governance effectiveness.

Upgrade and Change Risk

The Superform Protocol may evolve over time through upgrades or parameter changes approved by governance. Such changes may alter token utility, economic incentives, or protocol behavior in ways that negatively affect token holders.

Related-Party Participation Risk

Certain contributors, service providers, or investors may hold UP tokens or participate in governance. Their interests may differ from those of other token holders and could influence protocol decisions or market dynamics.

Market and Competitive Risks

Competitive Landscape

The decentralized finance ecosystem is highly competitive and rapidly evolving. Competing protocols may offer superior technology, user experience, incentives, or regulatory positioning. Increased competition could reduce adoption, usage, or relevance of the Superform protocol and UP token.

Adoption Risk

The value and utility of UP tokens depend on sustained adoption of the Superform protocol by users, developers, strategists, validators, and ecosystem partners. There is no guarantee that adoption will meet expectations or continue over time.

Security and Custody Risks

Private Key Management

Token holders are solely responsible for safeguarding their private keys and wallet credentials. Loss or compromise of private keys will result in permanent loss of access to UP tokens.

Cybersecurity and Fraud

Participants may be exposed to phishing attacks, scams, impersonation attempts, counterfeit tokens, or fraudulent communications. The Superform Foundation and affiliated entities are not responsible for losses resulting from third-party attacks or user error.

No Guarantee of Value or Utility

There is no assurance that UP tokens will have any value, liquidity, or utility. The success of the Superform protocol is uncertain, and UP tokens may become worthless. Participation should be undertaken only by persons who can bear the risk of total loss.
